How to Contribute

NetworkX is an open source project and we are glad to have contributions of code, documentation, examples, bug reports, and fixes or any other suggestions for improvements or features.

Bug Tracking and Feature Requests

Use the Trac ticket system to report a bug, or request a feature.

Because of ongoing spam problems you will need to register first. After you register and sign in, create a ticket by clicking on the "New Ticket" tab.

Source code

- *Subversion repository: https://networkx.lanl.gov/browser/networkx/trunk*
- *Timeline: https://networkx.lanl.gov/timeline*

To access the repository using subversion, you will need a subversion client (e.g. svn for Linux). Then check out the code using

```
svn co https://networkx.lanl.gov/svn/networkx/trunk networkx
```

Send email to hagberg@lanl.gov with patches or requests for source code repository write access.
